

Advances in Mechanics: Theoretical, Computational and Interdisciplinary Issues. M. Kleiber, T. Burczyński, K. Wilde, J. Górski, K. Winkelmann, Ł. Smakosz (Eds). CRC Press, 2016. ISBN 978-1-138-02906-4

1. **K. Bołbotowski & T. Sokół**: New method of generating Strut and Tie models using truss topology optimization, pp. 97-100
2. **S. Czarnecki & P. Wawruch**: Construction of stress trajectories in optimal, non-homogeneous elastic bodies, pp. 137-140
3. **T. Łukasiak**: HSp – an isotropic material interpolation scheme based on Hashin-Shtrikman variational bounds, pp. 355-359
4. **T. Sokół**: A new adaptive ground structure method for multi-load spatial Michell structures, pp. 525-528
